

## VetCare Online Veterinary Clinic Management System Sprint Planning Notes

Team: Group-P06-02

Sprint: 1

Date: 22.09.24

Attended:

Scrum Master: Idris Aklan

Product Owner: Jyoti Kundu

Development team: Yifan Shen, Shreyas Deepak Shah, Abdullah Abdosh, Frahan Wazer, Mohammed Ahtesh

### 1. Things That Went Well

*Successfully implemented the front-end UI using React.js within the planned time.*

*Discussions using Microsoft Teams helped resolve minor issues quickly and avoid delays on the project.*

### 2. Things That Could Have Gone Better

*The front-end design specifications lacked clarity at the beginning of the sprint, leading to some reworks.*

*The priorities of UI components could have been set more clearly.*

### 3. Things That Surprised Us

*We assumed that the data format on the backend would match the front-end requirements, but the API response structure was different, causing some delays in the integration.*

### 4. Lessons Learned

*Clearer and more detailed design specifications are needed to avoid unnecessary rework.*

*Build a front-end/back-end API contract at the beginning of the sprint to align the front-end and back-end on the expected data structure.*

### 5. Final Thoughts

*Things to keep:*

*Continue to use Microsoft Teams to solve quick issues.*

*Maintain three times weekly scrum meetings to track integration progress.*

*Things to change:*

*Have a dedicated API review meeting at the beginning of each sprint to ensure consistency in data structure and format.*
